Summary

Results-driven **Full Stack Developer & QA Engineer** with experience building and testing high-performance web and mobile applications. Skilled in **React, React Native (Expo), Next.js, Node.js/Express, MongoDB, PostgreSQL**, and modern UI frameworks. Proven track record of developing impactful projects, including a **real-time chat app with video calls** and **DumTraq**, a nationwide power outage tracking platform. Experienced in **end-to-end automation (Playwright)** and **performance testing (Appium, Lighthouse)** to ensure scalability, reliability, and optimal user experience. Strong ability to handle the full development lifecycle—**design, development, testing, and deployment**—with a focus on quality, performance, and user-centered design.

Experience

QA Engineer - Performance Testing, Hubtel Limited Feb 2025 – Present

- Conducted mobile performance testing using **Appium**, measuring app responsiveness, stability, and resource usage.
- Performed web performance audits with **Google Lighthouse**, analyzing page load, accessibility, SEO, and best practices.
- Generated performance reports and provided optimization recommendations to improve speed and reliability across platforms.

QA Engineer - End-to-End Web Testing, Hubtel Limited Oct 2024 – Jan 2025

- Conducted automated end-to-end testing for web applications using **Playwright**.
- Developed and published an npm package to simplify input testing.
- Created reusable test suites for consistent and scalable test coverage.

Full Stack Web Developer, BEISTAND LTD Nov 2023 – Present

- Developed responsive **landing pages** and interactive **dashboards** for company applications.
- Built and maintained backend services using **Node.js, Express**, and **MongoDB**.
- Created modern, high-performance frontends with **React, Next.js, Vite, Tailwind CSS**, and **Shadcn UI**.
- Migrated legacy dashboards from **React** to **Next.js** for better scalability and performance.

Frontend Developer, Intern, First Love Center Aug 2023 – Dec 2023

- Developed and maintained the church website using **React, JavaScript**, and **TypeScript**.
- Implemented responsive designs and user-friendly features.
- Integrated **Firebase** for real-time data and collaborated with the backend team.

Projects

Dumsor Tracking App landing page

- **Full-stack power outage tracking app** built to help users in Ghana and beyond report and view electricity outages in real-time.
- Developed the **frontend in React Native (Expo)** for mobile and a **landing page in Next.js**.
- Built the **backend with Node.js (Express)** and used **PostgreSQL** as the primary database.
- Integrated **push notifications** to alert users in affected areas.
- Designed an interactive **map interface with real-time outage indicators** and animated updates for reported issues.
- Handled the entire lifecycle: **design, development, deployment, and UX/UI**.
- Tools Used: React Native (Expo), Node.js, Express, PostgreSQL

Real-Time Chat Application

github repo

- Developed a real-time chat application supporting messaging, file uploads, audio recording, and voice/video calls.
- Utilized **React Native (Expo)** for mobile and **React** with **TypeScript** for web frontend.
- Built backend using **Node.js**, **Express**, **MongoDB**, and **Socket.IO**.
- Integrated **Agora SDK** for calls and **Cloudinary** for media storage.
- Implemented secure user authentication using **JWT** and **RBAC**.
- Optimized performance with **Redis** caching and **TanStack Query** for state management.
- Built a cross-platform real-time chatting app with multimedia sharing.
- Tools Used: React Native, React, Expo, Redis, TanStack Query, Node.js, MongoDB, Agora SDK

File Management Tool

github repo

- Created a command-line tool for locating and deleting files efficiently.
- Tools Used: Node.js, npm

Task Management Web App

github repo

- Developed a task management platform to facilitate task tracking and management.
- Tools Used: React, Next.js, Next Auth, Express.js, MongoDB

Education

University of Energy and Natural Resources, BS in Computer Science

Jan 2020 – Sept 2024

- **Coursework:** Computer Architecture, Comparison of Learning Data Structures and Algorithms, Computational Theory, Operating Systems, Fault Diagnosis and Failure Tolerance, Secure Network Systems, Embedded Systems, Robotics, Artificial Intelligence, Software Engineering, Project Management

Achievements

- Developed and deployed a cross-platform chat application with real-time messaging, video calls, and file sharing using **React**, **React Native**, **Node.js/Express**, **MongoDB**, **Socket.IO**, and **Agora**.
- Built and launched **DumTraq**, a power outage tracking app enabling users to report and monitor outages in real-time, improving community awareness and engagement.
- Migrated legacy dashboards from **React** to **Next.js**, significantly improving performance, SEO, and maintainability.
- Designed and implemented multiple company landing pages and dashboards with **Next.js**, **React**, **Vite**, **Tailwind CSS**, and **ShadCN UI**.
- Conducted end-to-end and performance testing with **Playwright**, ensuring high reliability and scalability of deployed applications.

Technologies

Languages: Java, JavaScript, TypeScript, C++ , Python

Frameworks & Libraries: React, Node.js, Express, Next.js, Firebase, React Native, Expo, Supabase

Tools & Technologies: MongoDB, Git, PostgreSQL

Other Skills: Unit Testing, Integrated Testing, End to End Testing, Automated Testing, Performance Testing, OOP, Frontend Development, Backend Development, Mobile Development, Full-Stack Development, English (Professional proficiency or above)
