SUMMARY

Results-driven Full Stack Developer & QA Engineer with experience building and testing high-performance web and mobile applications. Skilled in React, React Native (Expo), Next.js, Node.js/Express, MongoDB, PostgreSQL, and modern UI frameworks. Proven track record of developing impactful projects, including a real-time chat app with video calls and DumTraq, a nationwide power outage tracking platform. Experienced in end-to-end automation (Playwright) and performance testing (Appium, Lighthouse) to ensure scalability, reliability, and optimal user experience. Strong ability to handle the full development lifecycle: design, development, testing, and deployment, with a focus on quality, performance, and user-centered design.

EXPERIENCE

Hubtel Limited Feb 2025 - Present

QA Engineer - Performance Testing

Ghana

- Conducted mobile performance testing using Appium, measuring app responsiveness, stability, and resource usage.
- Performed web performance audits with Google Lighthouse, analyzing page load, accessibility, SEO, and best practices.
- Generated performance reports and provided optimization recommendations to improve speed and reliability across platforms.

Hubtel Limited Oct 2024 - Jan 2025

QA Engineer - End-to-End Web Testing

Ghana

- Conducted automated end-to-end testing for web applications using Playwright.
- Developed and published an npm package to simplify input testing.
- Created reusable test suites for consistent and scalable test coverage.

BEISTAND LTD Nov 2023 - Present

Full Stack Web Developer

Ghana

- Developed responsive landing pages and interactive dashboards for company applications.
- Built and maintained backend services using Node.js, Express, and MongoDB.
- Created modern, high-performance frontends with React, Next.js, Vite, Tailwind CSS, and Shadcn UI.
- Migrated legacy dashboards from React to Next.js for better scalability and performance.

First Love Center Aug 2023 - Dec 2023

Frontend Developer, Intern

Ghana

- Developed and maintained the church website using React, JavaScript, and TypeScript.
- Implemented responsive designs and user-friendly features.
- Integrated Firebase for real-time data and collaborated with the backend team.

PROJECTS

DumTraq (Dumsor Tracking App)

Full-stack power outage tracking app built to help users in Ghana and beyond report and view electricity outages in real time. React Native (Expo) mobile frontend, Next.js landing page, Node.js (Express) backend with PostgreSQL, push notifications, and an interactive map with

real-time outage indicators. Handled the whole lifecycle: design, development, deployment, and UX/UI.

React Native (Expo), Node.js, Express, PostgreSQL

Real-Time Chat Application

Real-time chat supporting messaging, file uploads, audio recording, and voice/video calls. Backend with Node.js, Express, MongoDB and Socket.IO; Agora SDK for calls, Cloudinary for media, JWT and RBAC for authentication, Redis caching and TanStack Query for performance.

React Native, React, TypeScript, Node.js, MongoDB, Socket.IO, Redis, Agora

File Management Tool

Command-line tool for locating and deleting files efficiently.

Node.js, npm

Task Management Web App

Task management platform to facilitate task tracking and management.

React, Next.js, Next Auth, Express.js, MongoDB

EDUCATION

BS in Computer Engineering (Second Class Lower) University of Energy and Natural Resources Jan 2020 - Sept 2024

Coursework: Computer Architecture, Data Structures and Algorithms, Computational Theory, Operating Systems, Fault Diagnosis and Failure Tolerance, Secure Network Systems, Embedded Systems, Robotics, Artificial Intelligence, Software Engineering, Project Management.

ACHIEVEMENTS

Developed and deployed a cross-platform chat application with real-time messaging, video calls, and file sharing using React, React Native, Node.js/Express, MongoDB, Socket.IO, and Agora.

Built and launched DumTraq, a power outage tracking app enabling users to report and monitor outages in real time.

Migrated legacy dashboards from React to Next.js, improving performance, SEO, and maintainability.

Designed and implemented multiple company landing pages and dashboards with Next.js, React, Vite, Tailwind CSS, and ShadCN UI.

Conducted end-to-end and performance testing with Playwright for deployed applications.

TECHNOLOGIES

Languages: Java, JavaScript, TypeScript, C++, Python

Frameworks & Libraries: React, Node.js, Express, Next.js, Firebase, React Native, Expo, Supabase

Tools & Technologies: MongoDB, Git, PostgreSQL, Linux (Linux Mint)

Testing: Playwright, Appium, Lighthouse, Unit Testing, Integration Testing, End-to-End Testing, Performance Testing

Other: OOP, Frontend Development, Backend Development, Mobile Development, English (Professional proficiency or above)
